The scheme is being implemented through POWERGRID, in association with six beneficiary North Eastern states namely, Assam, Manipur, Meghalaya, Mizoram, Nagaland, and Tripura. The main objective of the project is Government of India's commitment for the total economic development of North Eastern Region and to strengthen the Intra-State Transmission & Distribution Infrastructure in the North East region. Implementation of this scheme will create a reliable power grid and improve NER States' connectivity to the upcoming load centers, and thus extend the benefits of the grid connected power to all categories of consumers in North Eastern region. Team POWERGRID, as part of its steadfast commitment towards service of the nation, is leaving no stone unturned to ensure power transmission during the pandemic.

POWERGRID presently has 270 Sub-stations, 173,790 Ckm, and 493,042 MVA of transformation capacity. With the adoption of latest technological tools and techniques, enhanced use of automation and digital solutions, POWERGRID has been able to maintain average transmission system availability >99%.
